Aquilent's Agile Team

Name/Role	Experience
Mark Pietrasanta/ Product Manager	Mark Pietrasanta has more than 20 years of experience as a proven technology industry leader. As the lead technical strategist at Aquilent, Mr. Pietrasanta is responsible for identifying and nurturing novel technologies and executing them into viable solutions. He works as a strategic partner with customers, helping them identify, plan, and achieve their technology strategy while fulfilling the goals of a transparent and participatory democracy. Most recently, he oversaw—and continues to manage—the development and execution of Aquilent's core solutions in Cloud services and digital strategy, helping Federal organizations map their technology agendas and strategic goals to mission objectives.
Jason Zeckowski/ Delivery Manager	Jason Zeckowski has over 15 years of experience in all aspects of Web development, implementation, and creative leadership. His versatile experience includes Agile PM methodology, user interface and user experience design, information architecture, taxonomy, and Web development. He is an Agile Scrum Master currently working on Healthcare.gov.
Christine Armstrong/ Visual Designer	Christine Armstrong is a creative lead with 20 years of multimedia design experience including digital user interface and user experience design, content management, brand mark creation, publications, advertising campaigns, marketing concepts and collateral, packaging, and overall consistency in transcending the brand experience. She was Aquilent's design lead for the new Usability.gov and the new HHS.gov, both responsive designs launched in Drupal.
Trumaine Johnson/ Backend Web Developer	Trumaine Johnson has 5 years of experience as a full-stack engineer on a multidisciplinary scrum agile development team. Trumaine provides object-oriented PHP Web development working with WordPress, Drupal, and Laravel framework. Trumaine created server- and client-side JavaScript modules utilizing jQuery, Node.js, RequireJS, Knockout.js, and Ember.js. Trumaine managed and optimized relational data with experience using PostgreSQL, SQL Server, and MySQL database management systems. Trumaine has experience working with Java-based Android mobile applications and provides test-driven development utilizing unit tests and automated Selenium regression tests. Trumaine implemented providers and consumers for REST and SOAP Web services. Trumaine has manipulated and processed XML and JSON data. Trumaine has experience with Git and Subversion source code management systems.

Name/Role	Experience
Sara Kieffer/ Writer/ Content Designer/ Content Strategist	Sara Kieffer is a digital content strategist with over 8 years of experience in managing and implementing Web content strategies in the healthcare industry. She has extensive experience in writing and editing content, developing digital content strategies, integrating social media, enhancing search engine optimization tactics, auditing content, and analyzing and tracking Web traffic and key performance indicators with analytics programs.
Doug McDonald/ Front End Web Developer (QA Tester) and Business Analyst	Doug McDonald is a business analyst and senior software test lead with over 15 years of experience in white and black box software testing, Web testing, and automated testing using Empirix, Rational, and Mercury tools. Mr. McDonald is an advanced-level ISTQB-certified tester with a strong background in requirements management, configuration management, change management, and quality assurance.
Jeff Pass/ Interaction Designer/ User Researcher/ Usability Tester	Jeff Pass has more than 18 years of experience as a Web information architect and user experience professional, with the majority of his projects focused on the application of Agile methods to design highly-usable Websites for the Federal Government. Mr. Pass has specialization in information architecture, user-centered design and human computer interaction, graphical user interface design, usability, and usability testing.
Rob Proper/ DevOps Engineer	Rob Proper is an accomplished software professional with over 23 years of experience in software design and development. He is a solution architect focused on Aquilent's WCMS, development technology, and Agile methods. He brings expertise in WCMS technologies (e.g., Percussion and Drupal) and Cloud technologies (e.g., AWS and Terremark) and has performed as technical lead across numerous Aquilent projects. As an expert in open source driven continuous integration, he provides the critical DevOps link between application development and configuration management.
Eric Robbins/ Front End Web Developer	Eric Robbins has over 21 years of professional experience, with 13 years implementing and managing a wide array of digital projects, including small- and large-scale Web and mobile sites on Agile teams, design and front end development, digital strategy development, branding and identity campaigns, print campaigns, event marketing, and multimedia engagements. He has expertise with HTML5, CSS3, JQuery, responsive design frameworks (Bootstrap and Foundation), and integrating front end code with development environments.
Craig Warsaw/Technical Architect	Craig Warsaw is currently Chief Architect at Aquilent, leading a team of solution architects. Mr. Warsaw is an expert solution and systems architect, AWS Certified Solutions Architect, object-oriented software designer and developer, and an experienced technical lead and project manager. He has expertise architecting, designing, and developing Cloud, WCMS, and portal and custom solutions, as well as experience in integrating solutions using Web Services and other
